

GAS TRANSMISSION PIPELINES

Precision and Performance for Seamless Flow

affgroup.net.au

**GLOBAL PLAYER.
LOCAL MANAGEMENT.**

Gas transmission pipelines and metering stations are essential infrastructure components that require high-quality products to ensure the efficient, safe, and reliable transportation of gas over long distances from production sites to end-users.

Australasian Fittings & Flanges (AFF) offers a range of high-quality products, including pipelines, monolithic insulating joints (MIJs), fittings, flanges, valves and pipeline accessories for the lifecycle of your operation. We conduct thorough specification reviews to guarantee full compliance and traceability of all our products.

Additionally, our project management services encompass order management, technical queries, documentation, expediting, and logistics, providing a seamless experience. Our expert advice ensures correct installation, maintenance, and ongoing functionality of your operations.

Standard Product Range

- Monoflange
- Check Valves (Swing, Non-Slam, Dual Plate or Piston)
- Gate Valves
- Globe Valves
- Butterfly Valves
- Plug Valves

Additional Scopes

- Monolithic Insulating Joints (MIJs)

OUR STRENGTHS

Specialised Forged Products: We specialise in customised forged products for demanding applications.

In-House Manufacturing: All manufacturing processes, including forging, heat treatment, machining, and painting, are conducted in-house, ensuring optimal control at every stage.

Specification Compliance: We conduct thorough specification reviews to ensure complete compliance with all requirements.

Quality and Traceability: Our commitment to high quality and superior customer service includes full traceability of materials back to the raw source.

Ongoing Support: We provide ongoing solutions, advice, and recommendations throughout the entire lifespan of your plant.

Global Sourcing: We source superior quality products from globally renowned manufacturers, all of whom are ISO 9001 certified.

Material Selection: Our meticulous material selection process ensures extended facility longevity.

Consistent Delivery: Renowned for our consistent delivery of high-quality products.

Prompt Responses: Rely on us for prompt and precise responses to your inquiries.

Comprehensive Project Management: Our services cover order management, technical queries, documentation, expediting, logistics, and more.

Expert Guidance: Receive expert guidance to ensure accurate installation, maintenance, and sustained functionality.

“Bringing the manufacturer to the client” is the principle that drives our success. AFF offers a comprehensive, globally competitive supply chain, delivering innovative and cost-effective solutions tailored to client specifications. Our goal is to be the preferred supply partner, consistently ensuring that our product quality exceeds client expectations.
